The Natural Choice

microtech-aligator Systems are the UK based world leaders in environmentally friendly swimming pool water treatment.

Why not be kinder to your client and the environment by:

- Reducing the need for harmful chlorine sanitisation by 60-75%
- Dramatically reducing the production of Greenhouse gases
- Enjoying crystal clear allergy free water to drinking quality standards
- Recycling or using the backwash for irrigation

microtech-aligator

works by harmlessly releasing copper and silver ions into the swimming pool water which creates a residual and stable sanitisation.

microtech-aligator

runs automatically with its own intelligent and user friendly operator controls.

microtech-aligator

continually monitors the condition of the electrodes and the pool water.

microtech-aligator

will sound an alarm if attention is needed.

microtech-aligator

Systems can be fitted to indoor or outdoor pools from 1,000 to 350,000 gallons.

The Natural Choice

Copper and silver are both naturally occurring elements and have been used since their discovery for purifying water.
